Strategic Enterprise Architect | Cloud Technology Leader | Innovator
| Results-Driven Professional | Transformational IT Expert | Agile
Cloud Solutions | Driving Business Growth Through Technology
Dallas-Fort Worth Metroplex

Summary

With over two decades of diverse and dynamic professional experience, I bring a wealth of expertise to the table. As an Enterprise Architect at Builders FirstSource, I spearhead innovative solutions, leveraging my technical proficiency honed since my early roles as a Delivery Driver and Assistant Merchandiser. In my extensive tenure at Builders FirstSource, I've led the development, support, and maintenance of SharePoint enterprise applications, demonstrating my mastery in applying Microsoft SharePoint best practices. I've played pivotal roles in system administration, business analysis, and project management for SharePoint-based solutions, showcasing my ability to streamline processes and drive business results. My journey includes AppleCare Advisor roles, where I navigated critical periods during iOS launches, showcasing adaptability and resilience. As a Lead SharePoint Systems Engineer, I managed a small team, optimizing SharePoint workflows and contributing to process improvements.

In addition to my rich work history, I hold a bachelor's degree in Information Technology from Western Governors University. My commitment to continuous learning is evident in my certifications, including A+, and my proficiency in cutting-edge technologies. I bring a unique blend of strategic thinking, technical prowess, and leadership acumen. My journey from an Estimation Services Manager at Huttig Building Products to my current role as an Enterprise Architect has equipped me with a comprehensive skill set. I excel in roles requiring structural analysis, design, and estimation, as demonstrated during my tenure at A.C. Houston Lumber Company and Huttig Building Products.

My diverse experience spans technology, estimation, design, and leadership, making me an ideal candidate for roles requiring a multifaceted skill set. I look forward to contributing my strategic

insights, technical expertise, and leadership skills to drive innovation and achieve organizational goals.

Experience

Builders FirstSource

13 years 1 month

Enterprise Solutions Architect

April 2022 - Present (3 years 7 months)

Dallas-Fort Worth Metroplex

- Lead strategic architecture for BFS's digital channels, aligning with the mission of being a premier supplier.
- Drive realization of BFS's vision, making homeownership more achievable and positioning the company as the industry's most valuable partner.
- Orchestrates thought leadership for seamless integration between myBLDR.com, Salesforce CRM (Engage), SAP Hybris, and 130+ industry-specific applications within OTC.
- Advises on architecture, emphasizing a holistic approach for quantification, bidding, quoting, and sales processes.
- Collaborates to analyze and guide integrations for myBLDR.com, Salesforce CRM, SAP Hybris, and various applications across the OTC landscape.
- Shapes digital architecture aligned with BFS's B2B model, focusing on efficiency, transparency, and superior customer experiences.
- Provides strategic guidance for quantification, bidding, quoting, and sales, enhancing operational efficiency and driving innovation.
- Drives breakthrough innovations, transforming the homebuilding industry through continuous improvement of digital channels.
- Enhances customer experiences through myBLDR.com, ensuring seamless interactions across Salesforce CRM, SAP Hybris, and OTC applications.
- Aligns architectural decisions with BFS's core values: Safety, People, Integrity, Customers, and Excellence, fostering a culture prioritizing these values.
- Collaborates to understand business needs, aligning digital strategies with BFS's commitment to exceptional customer service.
- Orchestrates thought leadership in the digital channels domain at Builders FirstSource.
- Drives recommendations and guidance for seamless integrations between myBLDR.com, Salesforce CRM (Engage), SAP Hybris, and 130+ applications.

- Ensures robust interoperability for smooth quantification, bidding, quoting, and sales processes within the OTC lifecycle.

Salesforce Solutions Architect

August 2021 - April 2022 (9 months)

Dallas, Texas, United States

- Co-initiated and led the transformative "Engage" initiative at Builders FirstSource, overseeing the comprehensive implementation of Salesforce's Sales Cloud, Service Cloud, Salesforce Maps, Salesforce Inbox, and CRM Analytics.
- Orchestrated the integration of advanced Salesforce solutions, empowering a substantial sales team of nearly 5,000 members to elevate sales efficiency and revolutionize customer engagement.
- Crafted and executed a strategic plan focused on attaining a nuanced understanding of customer spend, wallet share, and year-over-year deltas across diverse customer segments, markets, and product lines.
- Leveraged Salesforce's powerful analytics tools to extract actionable insights, enabling the sales team to make informed, data-driven decisions and optimize their approach to customer interactions, market dynamics, and product strategies.
- Emphasized forward-looking analysis, forecasting future sales trends, and enabling proactive decision-making regarding inventory management and supply chain capacity alignment.
- Delivered tangible outcomes, including enhanced visibility into customer behaviors, increased wallet share, and a deeper comprehension of market intricacies. These insights empowered the sales team to tailor strategies, resulting in heightened customer satisfaction and revenue growth.
- Facilitated cross-functional collaboration to ensure seamless integration of Salesforce solutions with existing systems, maximizing the impact and effectiveness of the Engage initiative.
- Contributed significantly to Builders FirstSource's overarching objectives, aligning technological advancements with dynamic business needs and fostering a culture of continuous improvement and innovation.
- The Engage initiative stands as a testament to strategic leadership and successful integration, positioning Builders FirstSource as an industry pioneer in leveraging technology for business growth.

Senior Business Solutions Architect

July 2020 - August 2021 (1 year 2 months)

Dallas, Texas, United States

- Spearheaded the evaluation and replacement initiative for SharePoint 2013 and Nintex based workflow applications, resulting in the selection of Salesforce's Lightning App Builder, Flow Builder, and Process Flow capabilities.
- Defined meticulous specifications for new products/services, applications, and service offerings, ensuring seamless integration with Salesforce solutions.
- Identified strategic, core, and support processes transcending functional boundaries, collaborating closely with stakeholders for alignment with Salesforce capabilities.
- Conducted assessments to guarantee compatibility and integration of Salesforce solutions, establishing a cohesive architecture across interdependent technologies.
- Provided strategic insights on automation needs, guiding optimal utilization of Salesforce tools to streamline work processes.
- Led training sessions on Salesforce tools and best practices, playing a pivotal role in implementing robotic solutions.
- Demonstrated a unique blend of business acumen, analytical prowess, and a strong technical background in Salesforce automation.
- Orchestrated the collection and analysis of project business requirements, translating them for implementation within the Salesforce environment.
- Collaborated with stakeholders to quantify productivity gains associated with Salesforce technology and calculated return on investment.
- Acted as a crucial liaison, ensuring seamless communication of information needs between the business and IT, aligning processes with Salesforce capabilities.
- Led dynamic business process modeling sessions, contributing significantly to process development, assessment, streamlining, redesign, and identifying opportunities for improvement within the Salesforce ecosystem.
- Collaborated with stakeholders to identify manual and repetitive processes for conversion to Salesforce technology, enhancing overall efficiency with Salesforce's Lightning App Builder, Flow Builder, and Process Flow.

Senior Applications Engineer

July 2018 - July 2020 (2 years 1 month)

Dallas, Texas

- Led the development, support, and maintenance of SharePoint enterprise applications, applying subject matter expertise to design solutions following Microsoft SharePoint best practices.
- Utilized problem recognition, research, isolation, and resolution steps to diagnose and solve complex issues, leveraging integrated processes.

- Maintained systems operations procedures, change control records, and necessary documentation.
- Managed service requests from the Help Desk for SharePoint and Intranet activity, ensuring quality and responsiveness by prioritizing tickets and assisting staff in identifying, diagnosing, and resolving technical issues.
- Served as the primary point of contact for all requests to the SharePoint team, redirecting as needed to other team members.
- Functioned as a business analyst and project manager for SharePoint-based solutions, particularly those not large enough to justify a dedicated BA or PM resource.
- Acted as the lead developer for business process automation solutions, leveraging expert understanding of company needs and existing solutions within and beyond SharePoint.
- Implemented SharePoint best practices across all site collections and educated users on following SharePoint guidelines.
- Maintained a current inventory of all solutions and contacts for SharePoint-based solutions.
- Provided SharePoint training to site owners and general users.
- Kept current knowledge of all solutions and dependencies within and outside of SharePoint, providing a holistic understanding of architecture and usage.
- Assisted in knowledge transfer of all roles and responsibilities related to SharePoint, Office 365, Nintex, and Intranet during on/off-boarding of new members to the SharePoint team.

Lead SharePoint Systems Engineer

February 2015 - July 2018 (3 years 6 months)

Olympia, Washington

- Non-management lead of a small team and oversaw all aspects of SharePoint 2013 system administration and web development.
- Effectively continued previous SharePoint Systems Engineer responsibilities, serving as the go-to expert for support, troubleshooting, and issue resolution.
- Engaged in regular collaboration with business representatives, actively participating in requirements gathering, development, testing, and feedback solicitation to ensure the alignment of technical solutions with business needs.
- Elevated service delivery by focusing on escalated service requests and development projects, demonstrating proficiency in using Nintex and SharePoint workflows to optimize and streamline business processes.
- Applied advanced skills in custom HTML, CSS, and JScript to extend SharePoint functionality, enhancing user experience and system capabilities.

- Successfully managed and prioritized multiple projects, ensuring timely delivery of high-quality solutions in a dynamic and fast-paced environment.
- Spearheaded the implementation of innovative solutions, driving process improvements and achieving tangible business results.
- Maintained a client-centric approach, consistently delivering solutions that exceeded user expectations.
- Actively participated in team collaboration, fostering a positive work environment, and sharing knowledge to enhance overall team performance.
- Continued commitment to professional development, staying current with evolving technologies and industry best practices.
- Contributed to the documentation process, creating comprehensive guides and manuals for the benefit of end-users and future system administrators."

SharePoint Systems Engineer

September 2013 - February 2015 (1 year 6 months)

Denver, Colorado

- Solely responsible for SharePoint infrastructure, I functioned as the primary support resource, handling escalated requests related to SharePoint and OneDrive.
- Conducted frequent one-on-one sessions with end-users, delivering comprehensive training sessions and designing bespoke out-of-the-box solutions employing lists, libraries, pages, and sites.
- Demonstrated expertise in troubleshooting and resolving complex SharePoint issues, ensuring the seamless functionality of the platform.
- Collaborated with cross-functional teams to analyze user requirements, enhancing SharePoint functionalities to align with organizational goals.
- Streamlined and optimized SharePoint workflows, significantly improving efficiency and reducing response times to user requests.
- Maintained a proactive approach by staying abreast of the latest SharePoint trends and technologies, implementing best practices for enhanced system performance.
- Effectively communicated technical solutions to non-technical stakeholders, bridging the gap between technology and end-user comprehension.
- Played a key role in the implementation of security measures, ensuring the integrity and confidentiality of sensitive data within the SharePoint environment.
- Contributed to documentation processes, creating comprehensive guides and manuals to facilitate user understanding and support future system administrators.

- Demonstrated a commitment to continuous learning, acquiring new skills and certifications to stay current with evolving SharePoint technologies.
- Fostered a collaborative environment by participating in knowledge-sharing sessions and providing mentorship to service desk team members.

Application Support Engineer

October 2012 - November 2013 (1 year 2 months)

Denver, Colorado

- Provided senior-level technical support for MiTek applications used in the design, engineering, and fabrication of steel-plated wood-chord roof trusses and prefabricated wall panels.
- Supported over 500 users of the MiTek suite, with a focus on applications deployed via Citrix and dependent on Microsoft SQL Server databases.
- Functioned as the senior technologist, offering level-3 technical support for MiTek applications, subsystems, and associated computer and manufacturing equipment.
- Conducted planning and testing for all new deployments and upgrades, ensuring seamless integration and functionality.
- Authored comprehensive test plans for production and non-production environments, including elements critical to the MiTek suite.
- Managed projects with a scope of less than 200 hours, handling project management duties and justifying proposed projects through the creation of reports and diagrams.

Conduent

1 year 5 months

AppleCare Advisor for iOS

May 2016 - October 2016 (6 months)

Olympia, Washington, United States

- Played a pivotal role as a remote AppleCare Advisor during a critical period encompassing the launch of iOS 10 and several new Apple products.
- Provided expert support and guidance to users, addressing inquiries, troubleshooting issues, and ensuring a seamless transition for customers adopting the latest iOS version and devices.
- Proactively managed the surge in support demands during the high-profile release, contributing to the overall success of the launch.
- Demonstrated in-depth knowledge of iOS 10 features and functionalities, staying abreast of updates to effectively assist customers with product-related queries.

- Collaborated with cross-functional teams to relay user feedback and technical issues, facilitating continuous improvement in product performance and customer satisfaction.
- Successfully navigated a remote work environment, maintaining a high level of productivity and professionalism.
- Adapted swiftly to evolving support requirements, showcasing flexibility and resilience during a period of dynamic changes in Apple's product landscape.
- Contributed to the enhancement of customer support processes by actively participating in training sessions and sharing insights with the team.
- Upheld the renowned Apple customer service standards, ensuring a positive and enriching experience for users seeking assistance with iOS-related matters.
- Managed and resolved a diverse range of customer issues, showcasing a commitment to problem-solving and customer satisfaction.
- Engaged in ongoing learning to stay updated on Apple's product ecosystem, positioning myself as a valuable resource for both customers and the support team.
- Leveraged excellent communication skills to convey complex technical information in a clear and accessible manner, fostering positive interactions with customers.
- Maintained a high level of adaptability and responsiveness to meet the demands of a fast-paced and evolving remote support environment."

Verizon Wireless Customer Care

June 2015 - May 2016 (1 year)

Lacey, Washington, United States

- Served as a frontline representative for Verizon Wireless, addressing a wide range of customer inquiries related to device troubleshooting, sales, billing, plan changes, and service termination.
- Expertly handled customer interactions, providing comprehensive support and guidance to troubleshoot device issues and optimize user experience.
- Demonstrated strong sales acumen by effectively promoting Verizon Wireless products and services during customer interactions.
- Assisted customers in navigating billing-related inquiries, resolving issues, and ensuring accurate and timely billing information.
- Proactively engaged with customers to understand their needs and preferences, facilitating seamless plan changes and upgrades.
- Effectively managed and processed service termination requests, ensuring adherence to company policies and providing relevant information on the termination process.

- Maintained a high level of product and service knowledge to offer accurate and up-to-date information to customers.
- Consistently met and exceeded performance metrics, including call resolution times, customer satisfaction scores, and sales targets.
- Collaborated with cross-functional teams to address escalated issues and contribute to continuous improvement initiatives.
- Utilized effective communication skills to convey complex technical information and billing details in a clear and understandable manner.
- Demonstrated empathy and professionalism in handling customer concerns, contributing to a positive and customer-centric service environment.
- Actively participated in ongoing training programs to stay current with Verizon Wireless products, services, and customer care best practices.
- Adapted swiftly to changes in technology and service offerings, showcasing flexibility and agility in a dynamic call center environment.
- Upheld the reputation of Verizon Wireless by consistently delivering exceptional customer service and support."

Van Metre Companies

Framing Estimator

February 2011 - July 2011 (6 months)

Winchester, Virginia, United States

- Played a pivotal role as a Framing Estimator, contributing to the precision and efficiency of the estimation process within Van Metre Companies.
- Configured AmeriCAD's VisionREZ, an advanced add-on to Autodesk AutoCAD Architecture, optimizing the quantification and generation of hyper-accurate BOM (bill of material) reports.
- Applied advanced techniques in utilizing VisionREZ to create and analyze 3D models, specifically focusing on wood-framed structures, including both single-family and multifamily dwellings.
- Led the configuration of computer applications, creating standard templates, rules, and scripts to enhance the efficiency of the estimation process.
- Orchestrated a detailed alignment process, synchronizing the estimating database with the product inventory and SKUs available within the company's ERP system.
- Enhanced the accuracy of material quantification, streamlining the estimation workflow, and ensuring alignment with industry standards.
- Collaborated closely with cross-functional teams to seamlessly integrate VisionREZ into the overall estimation process, contributing to a cohesive and technologically advanced approach.

- Demonstrated proficiency in leveraging cutting-edge technologies to extract actionable insights from 3D models, contributing to a more comprehensive and detailed bill of materials.
- Actively engaged in continuous learning and exploration of emerging tools and methodologies within the field of framing estimation, staying updated with industry best practices.
- Successfully met project deadlines and requirements, consistently delivering high-quality BOM reports that met or exceeded company standards.
- Participated in training programs to enhance the team's capabilities in utilizing VisionREZ effectively, fostering a culture of knowledge-sharing and skill development within the estimation department.

Huttig Building Products

Estimation Services Manager

August 2008 - October 2010 (2 years 3 months)

Auburn, Washington

- Directed the comprehensive assessment, strategic planning, and successful implementation of an advanced estimation and design services system, significantly enhancing the company's operational efficiency.
- Played a pivotal role in supervising and leading a team of three highly skilled product specialists/designers in the local office, fostering a collaborative and innovative work environment.
- Directed an additional three staff members located in separate branch offices, ensuring cohesive teamwork and consistent achievement of departmental goals.
- Utilized advanced customization techniques with Autodesk AutoCAD Architecture, seamlessly integrated with Microsoft Excel, Access, and Microsoft SQL Server, enabling precise quantification of materials and optimizing the overall estimation process.
- Demonstrated technical prowess by constructing an internal, employee-facing site on Microsoft Office SharePoint Server (MOSS) 2007 and Microsoft SQL Server 2008. Leveraged team site templates and collaboration features to create a centralized platform for prioritizing customers and projects across all locations.
- Actively contributed to the refinement and improvement of the estimation and design services system, staying abreast of industry trends and incorporating innovative technologies to maintain a competitive edge.
- Developed and implemented training programs for the team, ensuring a high level of proficiency with the integrated software tools and fostering continuous skill development.

- Collaborated with cross-functional teams to streamline communication and facilitate seamless integration between estimation services and other departments, promoting an organization-wide culture of efficiency and collaboration.
- Established key performance indicators (KPIs) to measure the success and impact of the enhanced estimation and design services system, allowing for continuous assessment and refinement to meet evolving business needs.

EMS Mobile Computer Services

Hardware Support Technician

July 2006 - July 2008 (2 years 1 month)

Las Vegas, Nevada

- Played a pivotal role as a senior-level technician, specializing in comprehensive on-site technical support for both small business and in-home clients.
- Demonstrated exceptional troubleshooting skills, addressing a wide range of technical issues and ensuring optimal functionality of computer hardware.
- Provided advanced hardware replacements, including motherboards, power supplies, and network devices, contributing to seamless operations for clients.
- Established and configured high-speed internet and email services, guaranteeing reliable and efficient connectivity for diverse clientele.
- Applied expertise in setting up and configuring wireless networks, implementing robust security measures like WEP/WPA encryption.
- Utilized a deep knowledge base to set up networks within Windows and Apple environments, ensuring optimal system performance.
- Leveraged A+ Certification and over 4 years of experience to deliver effective and reliable technical solutions.
- Acted as the primary point of contact for small business clients, offering tailored support and maintenance services to meet their specific needs.
- Managed call volume efficiently, providing in-home support to individual customers when required.
- Consistently emerged as the top-selling technician, driving new system sales, upgrades, and hardware, contributing to revenue growth.
- Demonstrated versatility in managing various tasks, including Small Business Server management, laser printer service (maintenance kits), voice/data cabling, and Cisco equipment installation/troubleshooting.
- Actively engaged in project work, dedicating time and expertise to address complex technical challenges and contribute to company initiatives.
- Maintained accurate and legible work order documentation, ensuring transparency and accountability in all service activities.

A.C. Houston Lumber Company

4 years 3 months

Engineered Wood Products Specialist

May 2004 - July 2008 (4 years 3 months)

North Las Vegas, Nevada, United States

- Delivered expert guidance to customers, offering comprehensive assistance in product selection, specifications, and design services.
- Conducted precise estimations, collaborating closely with clients to understand and meet project requirements.
- Utilized advanced tools, including AutoCAD Architectural Desktop, Keymark KeyBeam, Adobe Acrobat, Microsoft Excel, Microsoft Access, and BluBeam, for modeling, estimating, and quoting.
- Successfully represented and promoted product lines from industry leaders such as Pacific WoodTech, Roseburg Forest Products, Filler King, and Rosboro Engineered Wood.
- Enhanced customer satisfaction through meticulous guidance, resulting in improved product selections and specifications.
- Optimized project planning and execution by providing accurate estimations, contributing to successful project outcomes.
- Employed cutting-edge technology tools to streamline modeling, estimating, and quoting processes, increasing overall efficiency.
- Actively promoted and represented diverse product lines, fostering strong partnerships with industry leaders.

Information System Manager

January 2005 - February 2008 (3 years 2 months)

North Las Vegas, Nevada

- Served as the divisional technology administrative lead, orchestrating the technology experience for 900 manufacturing employees across 7 plants in 4 states.
- Managed daily desktop support, efficiently addressing break/fix issues and ensuring seamless technology operations.
- Administered central file repositories and databases, optimizing data management and accessibility.
- Oversaw a technology workforce of approximately 100 employees engaged in estimation, sales, design, administration, and production scheduling.
- Supported all technology needs for the truss division's locations, ensuring a cohesive and streamlined technological infrastructure.
- Contributed to the division's success as it reached a combined business of over \$175,000,000 in 2005.

- Pioneered the creation of the company's first domain using Microsoft Active Directory 2003, enhancing system organization and security.
- Successfully migrated email services from a pop3 hosted provider to a self-managed Microsoft Exchange 2003 system, optimizing communication efficiency.
- Implemented point-to-point campus wireless infrastructure across a 20-acre facility, enabling interconnected access to computer-controlled saws and fabrication lines.
- Deployed Windows-based terminal services initially with Tarentella, later upgraded to Citrix Metaframe, providing desktop applications to 70 thin client devices.
- Introduced thin-client devices across six locations, reducing the complexity of management and facilitating streamlined application upgrades.

Wall Panel Design Manager

October 2004 - January 2006 (1 year 4 months)

North Las Vegas, Nevada

- Led the strategic design of factory-assembled wall panel construction, overseeing the entire project life cycle.
- Produced intricate placement diagrams, precisely specifying structural framing members for optimal efficiency.
- Provided accurate and competitive project quoting and pricing, aligning with client expectations.
- Utilized advanced tools, including MiTek e-Frame, Walls+, AutoCAD Architectural Desktop, and Microsoft Excel, for precise modeling, estimation, and quoting.
- Successfully managed the end-to-end process of material sourcing, ensuring timely and cost-effective acquisition for projects.
- Directed the design process, ensuring the excellence and efficiency of factory-assembled wall panel construction.
- Enhanced project visualization and planning through the creation of detailed placement diagrams.
- Achieved precision in structural specifications, contributing to the durability and effectiveness of the constructed panels.
- Implemented competitive pricing strategies, resulting in increased project wins and client satisfaction.
- Streamlined material sourcing processes, optimizing project timelines and reducing costs.

Friendly Computers

Mobile PC Technician

September 2005 - May 2006 (9 months)

Las Vegas, Nevada

- Conducted on-site diagnostics, troubleshooting, and repair of computer systems, addressing hardware and software issues for residential and small business clients.
- Delivered exceptional customer service by effectively communicating technical solutions in a clear and accessible manner, ensuring customer satisfaction and issue resolution.
- Provided expert advice and recommendations on hardware upgrades, software installations, and data security measures, contributing to overall client satisfaction and loyalty.
- Executed comprehensive virus and malware removal procedures, safeguarding clients' systems from potential threats.
- Collaborated with clients to understand their specific technology needs and offered tailored solutions, demonstrating a commitment to delivering personalized service.
- Executed system backups, data recovery, and transfer operations, ensuring the integrity and safety of clients' valuable data.
- Stayed abreast of the latest technology trends and industry developments to provide informed recommendations and support to clients.
- Demonstrated adaptability and efficiency in managing and prioritizing multiple service calls, meeting deadlines, and exceeding performance metrics.
- Upheld Friendly Computers' commitment to excellence by adhering to quality standards and service protocols.
- Engaged in continuous learning and professional development to enhance technical skills and stay current with evolving technologies in the field.
- Maintained accurate and detailed records of service calls, ensuring transparency and accountability in client interactions.
- Collaborated with team members to share knowledge, insights, and best practices, fostering a collaborative and supportive work environment.

Huttig Building Products

Engineered Wood Designer

March 2002 - May 2004 (2 years 3 months)

Auburn, Washington

- Achieved rapid proficiency with primary design tools, including Louisiana-Pacific's Wood-E-CAD plug-in for AutoCAD, Keymark's KeyBuild, and Keymark's KeyBeam, showcasing adaptability and technological acumen.

- Elevated production output to match established team members within two months of arrival, demonstrating a steep learning curve and commitment to efficiency.
- Consistently outperformed all team members by the end of tenure, leading in square footage, lumber of buildings, and complexity of design.
- Utilized Louisiana-Pacific and Roseboro Forest Products' product lines to deliver high-quality designs tailored to customer requirements.
- Employed advanced design techniques, leveraging AutoCAD and Wood-E-CAD to create precise placement diagrams for engineered wood products.
- Conducted structural analysis using KeyBuild and KeyBeam, ensuring designs met stringent industry standards and compliance requirements.
- Managed Microsoft Excel for the creation of meticulous material lists and accurate price quotes, optimizing project estimation processes.
- Collaborated seamlessly with cross-functional teams, including architects, engineers, and sales professionals, to deliver tailored solutions to clients.
- Mentored new team members, sharing expertise and contributing to their onboarding and development within the company.
- Demonstrated adaptability and innovation, contributing to the enhancement of design processes and overall team efficiency.
- Contributed to maintaining Huttig Building Products' longstanding reputation in the Pacific Northwest as a leading provider of high-quality building materials.

Cascade Capital

Engineered Wood Product Designer

January 2001 - January 2002 (1 year 1 month)

Tacoma, WA

- Executed the integration of engineered wood products into architectural plans, employing Keymark's KeyBuild modeling and analysis system for precise design implementation.
- Conducted structural analysis using Keymark's KeyBeam for single-member sizing, ensuring adherence to industry standards and building codes.
- Utilized TurboCAD for refining placement diagrams, enhancing the visual clarity of design models.
- Managed Microsoft Excel for the creation of accurate material lists and price quotes, optimizing project estimation processes.
- Contributed to the introduction of Pacific Woodtech and Roseboro Forest Products to the Pacific Northwest market, as part of a larger team effort.
- In the initial stages of my career as a structural designer, I navigated challenges, learned from frequent mistakes, and demonstrated a commitment to continuous improvement.

- Maintained a focused role as a doer, operating independently from day-to-day business operations, with a dedicated emphasis on projects for our customer's customer.
- Functioned as a valuable team member within the larger machinery of Cascade Capital, aiding in the establishment of the company's presence in the Pacific Northwest.

Bayview Building Materials

Material Estimator

May 2000 - December 2000 (8 months)

Elma, WA

- Provided material take-offs and estimates for lumber and building materials.
- Sole in-house estimator responsible for supporting three outside salespeople and managing a designated list of customers.
- Utilized traditional tools such as a plan scaling roller, construction calculator, notepad for calculations, and Microsoft Excel for accurate and detailed material estimates.
- Collaborated with the sales team to provide comprehensive and timely estimates for new construction, remodels, and additions.
- Managed and sold to a designated list of customers, ensuring excellent customer service and satisfaction.
- Leveraged expertise in framing and finish lumber, fasteners, hardware, power and hand tools, cabinets, windows, doors, and millwork to meet customer needs.
- Contributed to the family-oriented and community-focused values of Bayview, aligning with the company's history of service since 1952.
- Demonstrated commitment to accuracy, attention to detail, and efficient turnaround in providing materials take-off services.
- Effectively communicated with customers and sales team to understand project requirements and recommend appropriate products.
- Embraced the collaborative and service-oriented culture of Bayview, contributing to the company's reputation for reliable and high-quality service.

Builders FirstSource

Inside Sales Representative

March 1999 - April 2000 (1 year 2 months)

Puyallup, WA

- Provided exemplary customer support to retail and contractor customers, addressing inquiries through walk-ins, telephone, and email channels. Assisted with product selection, pricing, availability, and refunds/exchanges.

- Determined customer requirements to recommend specific products and services, offering alternative solutions based on cost, availability, or specifications.
- Generated sales quotations, showcasing a comprehensive understanding of company products, procedures, and practices.
- Actively engaged in selling company products and services, specializing in material take-offs, estimates, and pricing for substantial packages such as decks, garages, millwork, kitchen, bath, doors, etc.
- Entered orders efficiently into the computer system, ensuring accuracy and timeliness.
- Blended product knowledge with effective sales techniques to meet customer expectations and contribute to the success of the Commercial Sales Division.
- Maintained a high level of professionalism and efficiency, contributing to the overall customer satisfaction and success of the sales team.
- Held a pivotal role in a fast-paced environment, meeting high standards for customer service and sales support.
- Achieved success in meeting the demands of the position and actively contributed to the team's performance.

Westcoast Moulding & Millwork Ltd

Warehouse Manager

October 1998 - March 1999 (6 months)

Woodinville, Washington

- Led warehouse operations at a satellite location, facilitating product distribution throughout the Puget Sound area.
- Oversaw day-to-day tasks associated with a specialty wood products warehouse, managing inventory, storage, and order fulfillment.
- Regularly made cross-border trips into Canada to pick up product loads, showcasing logistical expertise, while navigating the complexities of inspections and brokerage paperwork.
- Conducted sales cold calls, leveraging building permit listings in Snohomish, King, and Pierce counties to identify potential customers.
- Demonstrated adaptability by making 5 to 10 delivery stops on return trips, ensuring efficient and timely product deliveries.
- Enhanced operational efficiency by implementing strategic approaches to warehouse management within the unique context of a pop-up location.
- Collaborated closely with the sales team, contributing to a cohesive and effective business strategy.
- Navigated challenges posed by the DotCom collapse and changes to the Softwood Lumber treaty, contributing to informed business decisions.

- Executed warehouse duties beyond the typical scope, reflecting a comprehensive skill set and a proactive approach to business needs.

Dunn Lumber

1 year 5 months

Sales Associate

June 1998 - October 1998 (5 months)

Kent, WA

- Engaged with customers, including contractors, homeowners, and DIY enthusiasts, providing tailored assistance and advice for a diverse range of projects.
- Adapted flexibly to customer needs, demonstrating adaptability from kitchen remodels to intricate birdhouse projects.
- Generated sales and wrote quotes, showcasing a strong understanding of building materials and their applications.
- Processed returns and researched special order products, ensuring comprehensive product knowledge.
- Utilized the Point of Sale (POS) system to efficiently process orders, create quotes, and manage purchase orders.
- Presented available services, including custom cuts and deliveries, emphasizing the value-added offerings of the store.
- Maintained a clean, professional workstation and appearance, contributing to a positive in-store environment.
- Provided responsible advice to customers, building lasting relationships through knowledgeable and customer-centric interactions.
- Occasionally assisted customers in transporting products to their vehicles, enhancing the overall customer experience.
- Demonstrated strong communication skills, both verbal and written, ensuring effective customer interactions.
- Exhibited competent typing skills and proficiency in general computer operations, leveraging technology for seamless job performance.
- Successfully carried out other assigned duties, contributing to the overall efficiency of the sales operations.
- Leveraged prior retail experience to navigate the demands of the role effectively.

Assistant Merchandiser

June 1997 - July 1998 (1 year 2 months)

Seattle, WA

- Supported the lead merchandiser in executing strategic merchandising plans, ensuring alignment with established planograms.
- Collaborated in the construction of display units, maintaining a keen eye for detail to achieve visually appealing and sales-driven presentations.
- Conducted random cycle counts at all locations, contributing to accurate inventory management and minimizing discrepancies.
- Assisted in optimizing product placement within stores, enhancing customer visibility and accessibility.
- Leveraged organizational and logistical skills to streamline the merchandising process, ensuring efficiency in daily operations.
- Implemented visual merchandising techniques to enhance the overall aesthetic appeal of product displays.
- Contributed to maintaining a cohesive and standardized visual identity across all locations.
- Executed instructions with precision, fostering a collaborative and productive working relationship with the lead merchandiser.
- Adapted to evolving merchandising strategies, demonstrating flexibility and a proactive approach to achieving departmental objectives.
- Utilized problem-solving skills to address challenges related to display setup and product positioning.
- Communicated effectively with team members to ensure seamless coordination in merchandising activities.
- Upheld high standards of professionalism and attention to detail in all merchandising tasks.
- Participated in training sessions to enhance product knowledge and merchandising techniques.
- Fostered a positive and collaborative work environment, contributing to the overall success of the merchandising team.
- Engaged in ongoing professional development to stay abreast of industry trends and best practices in merchandising.

Barlament & Son Trucking

Delivery Driver

July 1997 - October 1998 (1 year 4 months)

Edmonds, WA

- Executed safe and timely deliveries as a Class B CDL Delivery Driver, ensuring the transportation of construction materials to job sites.
- Operated delivery trucks, forklifts, and saws with precision, contributing to the efficient handling of building materials.

- Collaborated with Load Builders, Delivery Coordinators, and Dispatch to coordinate and execute accurate deliveries.
