

(This is a compressed machine-readable academic-style resource designed for RAG ingestion.)

1. Workforce Psychology & Sociology (2025)

- Employees expect flexibility, autonomy, psychological safety, and transparent communication.
- Hybrid work normalized; ~70% of employees prefer some remote flexibility.
- Motivation trends: purpose-driven work, reduced tolerance for toxic leadership, demand for mental-health support.
- Organizational behavior shifts emphasize distributed leadership, cross-functional teaming, and asynchronous communication norms.

2. Employment Types: Structural Differences

Salary Employees:

- Paid fixed annual compensation.
- Expected to handle variable workloads; often exempt from overtime.
- Implicit expectations: ownership mindset, schedule flexibility, self-management.

Hourly Employees:

- Paid per hour; entitled to overtime.
- Implicit expectations: adherence to scheduling, task precision, shift reliability.

Commission Employees:

- Compensation tied to performance; high variability.
- Implicit expectations: competitive drive, pipeline discipline, CRM accuracy.

Union Employees:

- Governed by collective bargaining agreements.
- Explicit expectations: adherence to negotiated work rules, processes, seniority systems.

Non-Union Employees:

- Governed by employer policies; more discretionary management.

3. Behavioral Expectations (Explicit & Implicit)

Explicit:

- Code of conduct, attendance, safety, ethics, harassment-free behavior.

Implicit:

- Team responsiveness, positive communication tone, adaptability, initiative, willingness to learn AI tools.

4. Interview Question Taxonomy (External Candidates)

Behavioral:

- "Tell me about a time you resolved a conflict."
- "Describe a moment you used data to make a decision."

Technical:

- Job-specific skill validations (coding, financial modeling, operational planning).

Situational:

- "What would you do if your project timeline is cut in half?"

Values/Culture:

- "How do you handle ambiguity?"
- "What environment helps you do your best work?"

5. Internal vs. External Candidate Interviewing

Internal:

- More emphasis on performance track record, organizational alignment, promotability, leadership readiness.
- Questions probe readiness gaps: "Where have you improved since last year?", "What enterprise-level

impact have you delivered?”

External:

- Focus on skill validation, cultural fit, adaptability, and prior experience relevance.

6. Annual Reviews, Promotions & Merit Cycles

- Centered on performance ratings, KPI attainment, competencies, role scope expansion.
- Modern trend: continuous feedback replacing annual-only cycles.
- Promotion decisions require consistent behavior, cross-functional trust, and evidence of operating at next-level scope for 6–12 months.

7. Projections 2026–2030

- AI-supported hiring moves toward skills-first, portfolio-driven evaluation.
- Competency taxonomies standardized across industries.
- Behavioral analytics from collaboration platforms become normal.
- Increased use of AI in compensation benchmarking and flight-risk prediction.
- Organizations shift to outcome-based role definitions; job descriptions become dynamic.

8. Organizational Behavior Trends

- Rise of enterprise knowledge graphs enabling skill visibility.
- Flattened hierarchies; more enterprise architects and fewer middle managers.
- Psychological contract changes: employees expect development, fairness, transparent communication, and purpose alignment.
